STORM DRAIN CULVERT REPLACEMENT

The Emerald Bay Service District (EBSB) is in the process of replacing the storm drain culvert that is located across from the Maintenance Yard. This storm drain culvert runs under the road from the pool access road to the Community Center garden area.

The storm drain culvert has collapsed after over 70 years of service and is in need of replacement. Plans have been finalized to replace the culvert with concrete pipe that should last another 70 plus years.

The project will be constructed in stages to allow traffic to continue, allowing one lane to remain open at all times.

This project is scheduled to begin the week of October 23 and be completed by the end of the week.
